

Laboratoire Léon Brillouin

The French Neutron Source

Call for contributions to the annual report 2015

Every year, the annual report of the Laboratoire Léon Brillouin (LLB) illustrates the richness and excellence of the research performed with our instruments.

For the 2015 edition, we invite our users to contribute to this report by proposing at least one 2015 publication based on LLB experiments and presenting:

- original scientific results,
- new methodological developments
- major instrumental achievement

Guidelines for submitting highlights

You are invited to send your proposal to reports.LLB@cea.fr by **February 19th**.

After the acceptance of the articles by **March 11th**, you would hand in the full article. The approximate length would be two pages (font 11, single interline, ~600 words), including graphics and references. You should provide at least one graphic illustration of your results and up to three ones, showing the instrumental setup or diagrams. For help, a template Word document would be provided in order to appreciate the final appearance of your article.

The selected reports will address scientists of all the neutron scattering communities and also non-specialized public, curious to discover our research. Therefore, the texts submitted should be accessible to non-experts.

The deadline for the submission of articles will be **April 8th 2016**.

Email address for the submission of highlights and information: reports.LLB@cea.fr
