

Dear Colleagues,

We are organizing a School entitled: **WATER AT INTERFACES: NEW DEVELOPMENTS IN PHYSICS, CHEMISTRY AND BIOLOGY.**

The School will take place at the [Ecole de Physique des Houches](http://www.llb.cea.fr) in the French Alps at the foot of Mt. Blanc.

The registration fees are 825 Euros/person, **which includes the cost for a full-board stay at the Ecole for 10 days** (arrival on Monday April 15th evening, departure on Friday April 26th at noon). A subsidiary has been asked to the permanent training of CNRS, which, if granted, will allow CNRS agents to have their stay covered by their institution.

For more information, please visit the website of the School:

<http://www-llb.cea.fr/WATSURF-2013/>

The maximum number of participants is fixed to 70. We invite interested people to return as soon as possible the enclosed pre-registration file with a CV to:

Marie-Claire Bellissent-Funel

Email: marie-claire.bellissent-funel@cea.fr

If the number of applicants exceeds 45, the Scientific Committee and the Local Organizing Committee will make a selection. Priority will be given to people whose research area is tightly connected with the subject of the school as well as to students, post-docs and young researchers.

Marie-Claire Bellissent-Funel
